Chapter 3 – Reading and Writing Data in Pig

Exercise

1. In a terminal, inspect the file called u.user:
   ```
   $ less /home/training/ml-data/u.user
   ```

2. Log into the Grunt shell and LOAD the u.user file. The columns are: user id, age, gender, occupation and zip code. This file should already be in HDFS, but if not, use copyFromLocal.

3. DESCRIBE the relation.

4. Use DUMP to print the records you loaded.

5. Use STORE to save the records in a file. The resulting file should be comma-delimited.

6. Using a terminal or the Grunt shell, inspect the results.
